

Positioning: ARES-Harness vs. SOTA injection defenses

← the decision-integrity axis
orthogonal to surface defenses;
only integrity2

Conclusion:
integrity2

System	Surface guarded	Mechanism
Dual-LLM (Willison '23)	input (ctrl/data sep)	quarantined LLM
Spotlighting (Hines '24)	input	prompt marking (model)
Instr. Hierarchy (Wallace '24)	input priority	learned (training)
StruQ (Chen '24)	input	struct queries + learned
SecAlign (Chen '24)	input	preference-opt (learned)
CaMeL (Debenedetti '25)	action	cap interp-IFC (det.)
ARES-Harness (this work)	input + action	det. provenance-taint (no LLM in decision)
